Re: PSC Case No. 2012-00114  
Gas Line Relocations  
U.S. Route 127 – Albany Bypass  
Navitas Utility Corporation  
Albany, Kentucky

Dear Ms. Faulkner:

Please be advised that the work on this project has been completed. The project was divided into two separate contracts due to the Kentucky Transportation Cabinet having the road work separated into two separate projects. Contract 594-11-01 covered work from the Kentucky/Tennessee state line north to Spring Creek. Contract 594-12-01 covered work from Spring Creek north to Albany. Relocated gas mains included in Contract 594-11-01 were placed in service on October 01, 2012. The relocated mains in Contract 594-12-01 were placed in service on July 16, 2012. Final cleanup on both contracts was completed by the end of the year.

Find attached to this communication one set of "Record Drawings" (as-builts) for both construction contracts. We trust this is the information necessary for the updating of your records.

Sincerely,  
Bell Engineering

to me

Dear Mr. Ramey,

My records indicate that Bell Engineering was hired to construct above referenced order for Navitas KY NG, LLC. The project is gas distribution lines on Hwy. 127 on the Albany by-pass. Can progress be made on this project? Upon the completion of a copy of the as-built drawings along with a certified letter of completion Service Commission and this case number be referenced.

Please advise so that I can update this case file.  
Thanks you for your attention to this matter.

*Linda Faulkner*
